

Port of Tallinn: The first mover in port innovation

Rene Pärt

Member of the Management Board /
Chief Business Development Officer

PORT OF  TALLINN
The Port of Good News

Agenda

1. Company
2. Greentech journey
3. About Smart Port
4. Our innovation roadmap

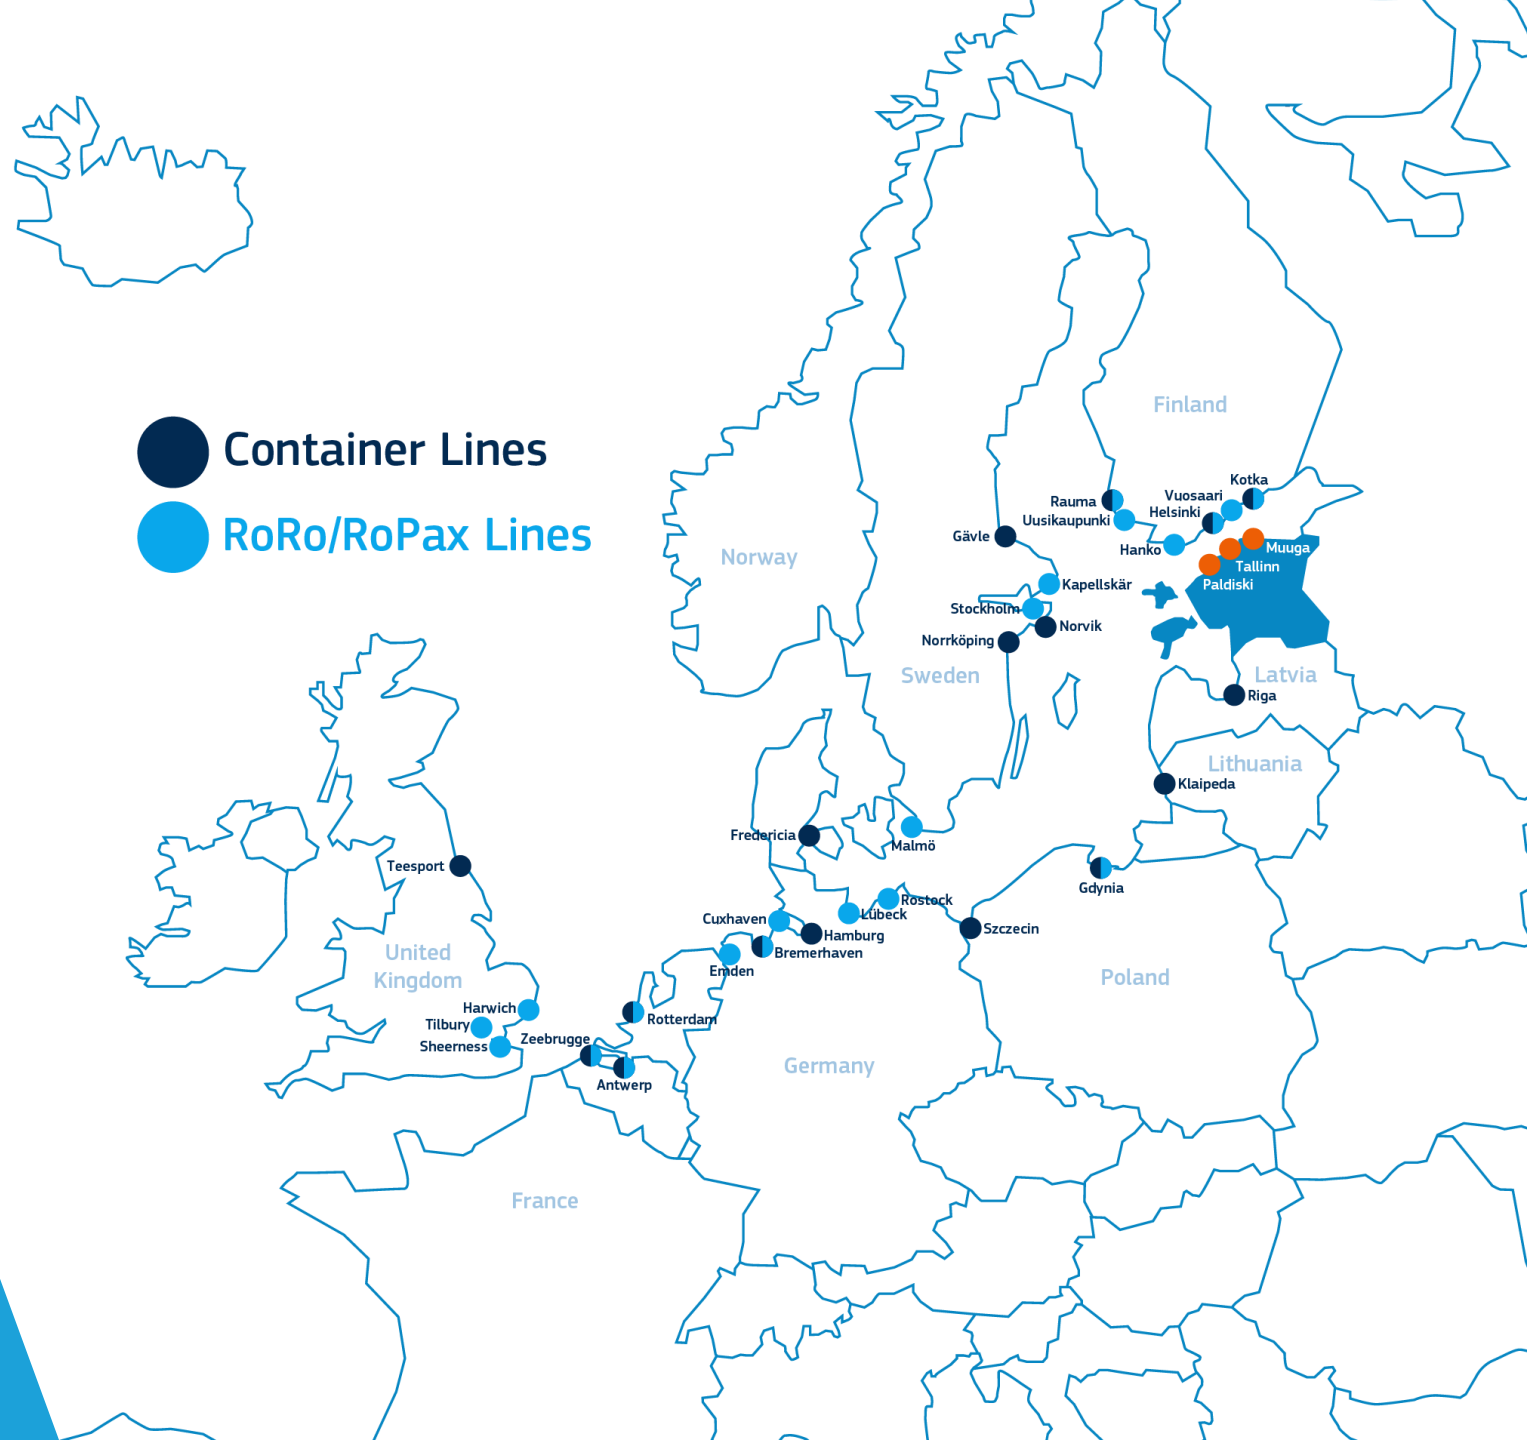

TALLINNA  SADAM

Company

Location

Positioned as a gateway to hundreds of millions of customers.

- Excellent road-, rail- and maritime connections for multimodality
- Regular daily connections with Scandinavian and European ports
- Ideal geographical location with low business risk for nearshoring

Port of Tallinn is a Listed Company

Port of Tallinn is listed on Nasdaq Tallinn
Stock Exchange since June 13, 2018.

Shareholders include:

67% Republic of Estonia

33% Investment funds,
pension funds, private investors

Nasdaq acknowledged Port of Tallinn as
the most remarkable stock exchange
debut of the year.

BUSINESS FIELDS

PORT OF  TALLINN

Passengers

- 10 M passengers a year
- 5450 ferry calls a year
- Old City Harbour and Saaremaa Harbour
- Welcoming passenger ships, offering and developing the port infrastructure, serving passengers and vehicles

Cargo

- 20 mln tons of cargo a year
- 1637 cargo ship calls a year
- Muuga Harbour, Paldiski South Harbour
- Welcoming cargo ships, offering and developing the port infrastructure, serving passengers and vehicles

Shipping

- Operating ferry traffic between the mainland and major islands
- 2 mln passengers, 1 mln vehicles a year
- Ice breaking in the ports of Northern Estonia

Real Estate

- 16 ha Old City Harbour real estate development
- 76 ha Muuga Industrial Park
- 39 ha Paldiski South Harbour Industrial Park
- 10 ha Saaremaa Harbour
- Land and commercial space

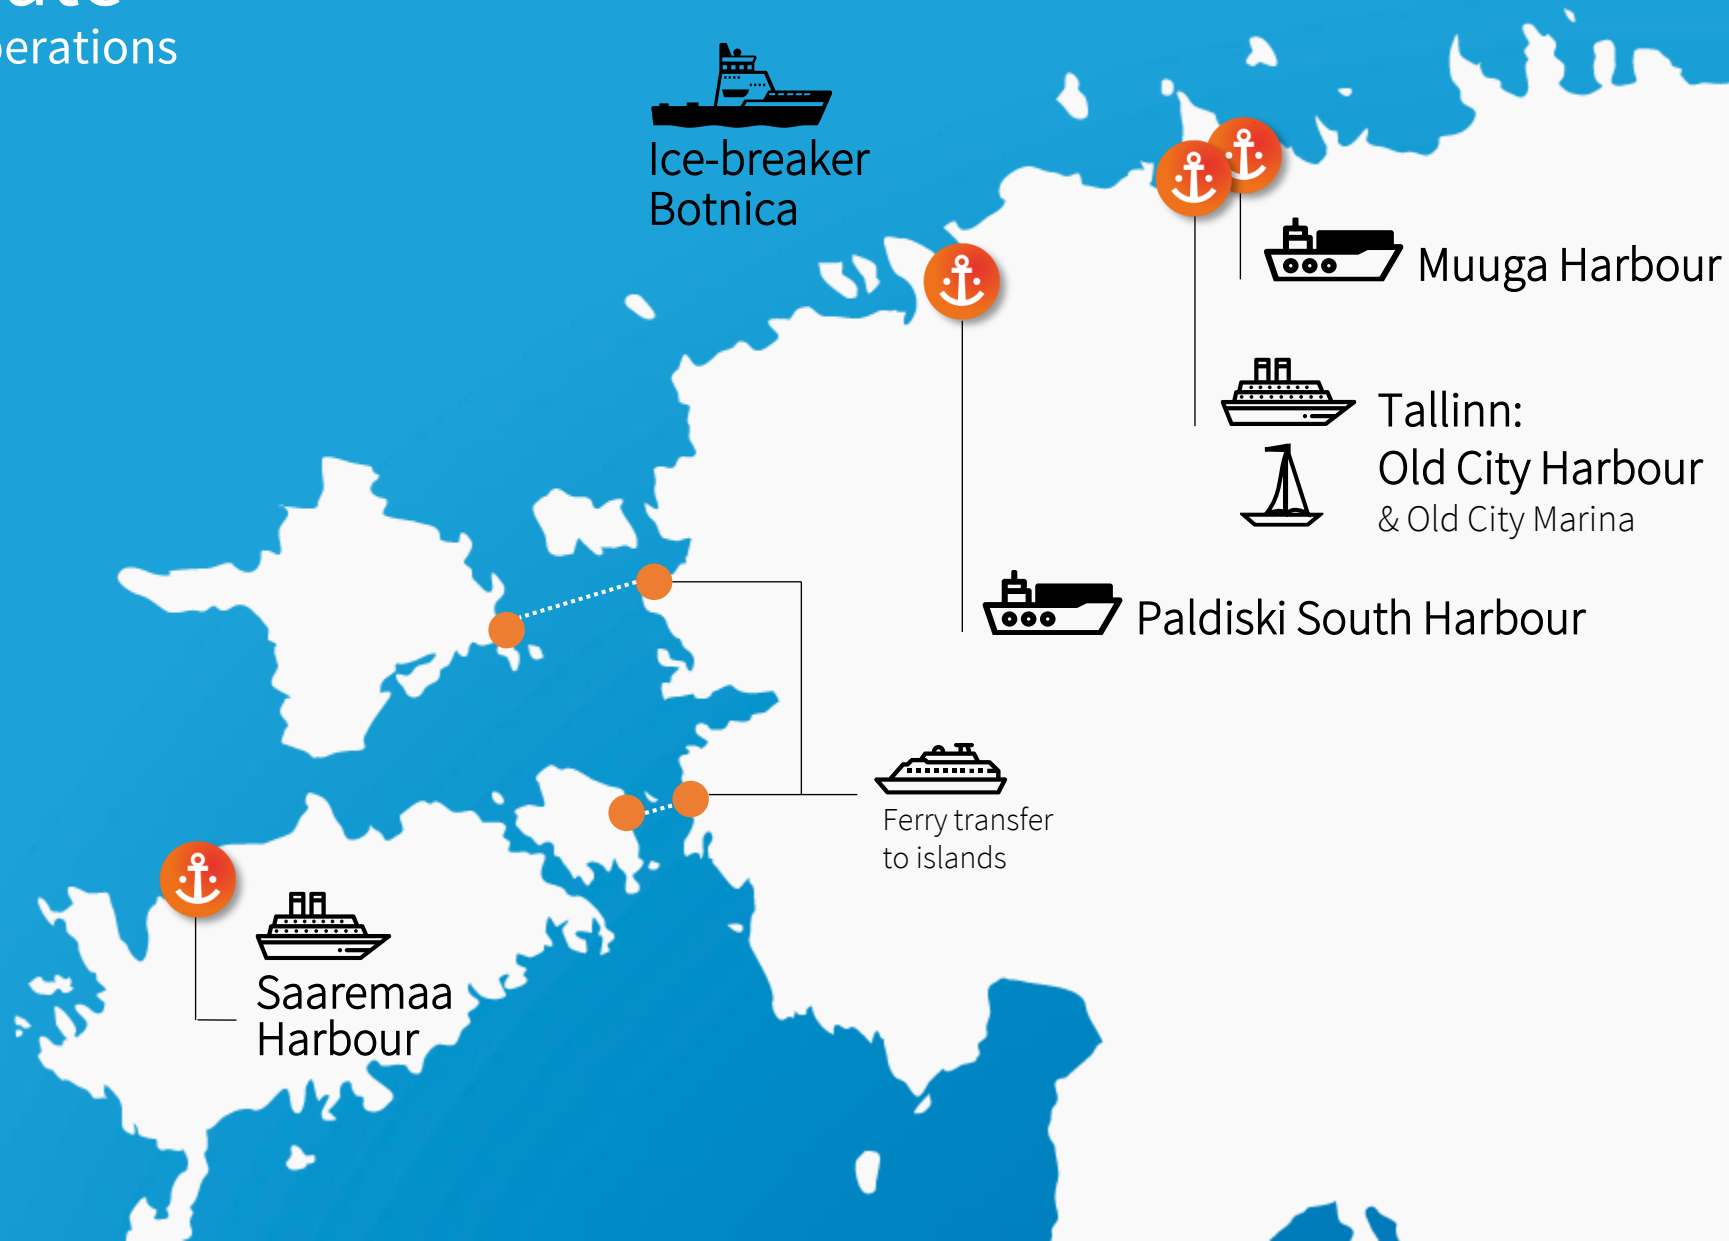

Where we operate

from harbours to vessel operations

Port of Tallinn doesn't by far mean ports in the city limits of Tallinn.

Port of Tallinn is a port complex with harbours located all over Estonia.

Old City Harbour

Muuga Harbour

Paldiski South Harbour

Saaremaa Harbour

The background image shows a boat moving across a body of water, leaving a white wake. A flag is visible on the right side of the boat. In the foreground, the backs of two people are visible as they look out over the water. The entire image is covered with a semi-transparent blue filter.

PORT OF  TALLINN

Greentech journey

Automooring

- 3 quays
- In use from 2021
- For ships on the shorter sea routes
- Shorter mooring time and lower fuel consumption
- Less air pollution
- Less noise and vibration

Onshore Power

- 5 quays
- In use from 2019
- Ships of the Finnish and Swedish route
- Less air pollution, noise and vibration
- 1 ship 7 h per day, decrease per year:
 - 1440 t CO₂;
 - 20 t NO_x;
 - 820 kg SO_x;
 - 2,5-3% fuel consumption
- Frequency 50 Hz, voltage 11kV

Smart Port

PORT OF  **TALLINN**
The Port of Good News

Over our 10 years of Smart Port journey, we have documented clear benefits for all parties involved

Ferry operators

Efficient terminal operations

E.g. 75% of FTEs saved on check-in and marshalling in Port of Tallinn; with additional potential. Loading efficiency. Easier to cope with seasonality.

Great customer experience

Terminal experience influences everything else on board!
NPS increase from 40 to 78 at TS Laevad.

Recover lost revenue

From correct classification of vehicles, number of passengers & long-term trailer parking.

Timely departure

Manage traffic flows in port and support timely departure of vessels - leading to lower sailing speeds and lower costs.

Port authority

Optimal use of land

Ferry operations can be accomplished from fewer m2. Several operators in same terminal.

Additional departures

Port enables efficient operations – attractive for new departures. Additional sailings can be added at unmanned hours.

Improved sustainability

Reducing congestion, idling in the port, and supporting fast turnaround of vessels in ports.

Access to accurate real time data

Opportunity for further operational improvements, supply chain efficiency, sustainability effect, and intermodal integrations.

2. Smart Port at Port of Tallinn

IMPLEMENTED

The Smart Port covers all aspects of ferry terminal operations with possibility for full-scale automation and most advanced data orchestration through integrations.

SMART PORT terminal operating system provides a comprehensive, accurate, real-time data overview of terminal operations.

Ro-pax & trucks

- Automatic data gathering
- Automatic check-in
- Exception handling
- Automatic classification
- Automatic marshalling
- Digitally assisted loading.

Drop trailers

- Access control & digital gate in
- Damage control
- Optimization of loading & work planning (integration with TOS)
- Validation at gate out.

Foot-pax

- Digital check-in
- Access control (smart gates)
- Guidance & messaging.

Employees & contractors

- Temporary & permanent permits
- Digital requests & request mgmt.
- Control across terminals
- Parking mgmt.

2. Smart Port at Port of Tallinn: Ro-pax & trucks

Terminal automation

The Smart Port solution provides a holistic view of terminal operations to support every team's unique needs.

PORT OF  TALLINN

1. Before the departure

Prepare the terminal gathering area layout (digitally) based on arriving vehicles.

2. Pre-gate

Identify vehicles and gather all relevant data to enable automatic processing, safety & security, and revenue mgmt.

3. Driving directions

Get the travelers attention and start the smooth, efficient and safe traffic guidance with personalized directions.

4. Check-in area

Provide access to the restricted loading/gathering area and direct drivers to the correct lane for loading.

5. Lock area

Provides orderly and safe passage to the correct marshalling area lane.

6. Digital marshalling

Automatically gather all vehicles per loading allocation type and prepare for loading.

7. Loading

Load vehicles onto the ferries in an efficient, safe and clear manner – with perfect overview of status.

8. Unloading

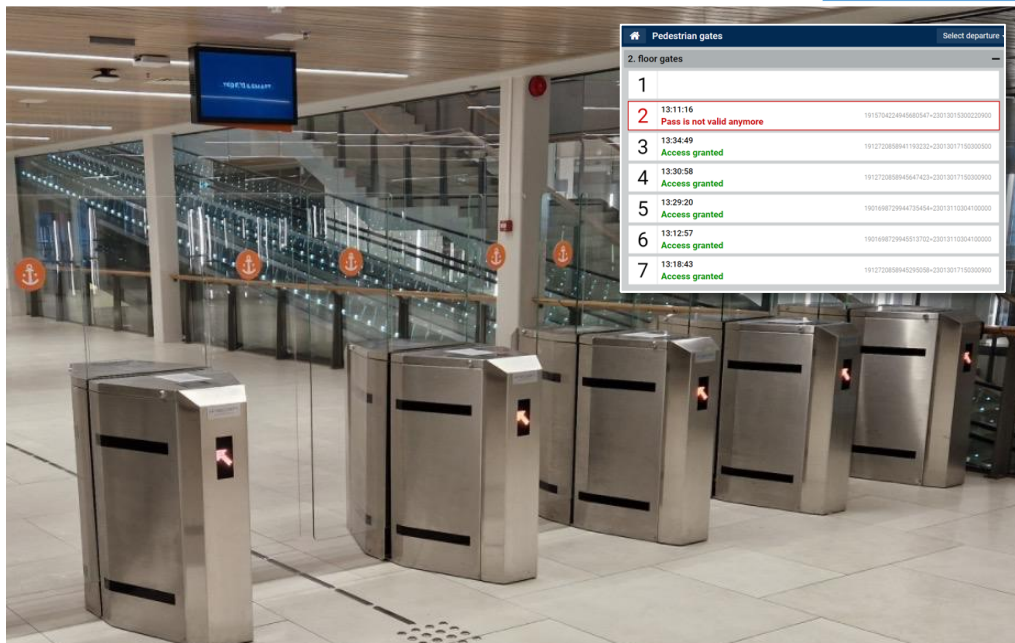

Guide vehicles out of the vessel and terminal – processes aligned with border guard and customs for needed checks.

9. Border shop

Duty free shop is integrated into the system as a seamless add-on, boosting revenues and customer experience.

The Foot-PAX solution allows for automatic passenger registering and smooth guidance to the vessel

FUNCTIONALITIES

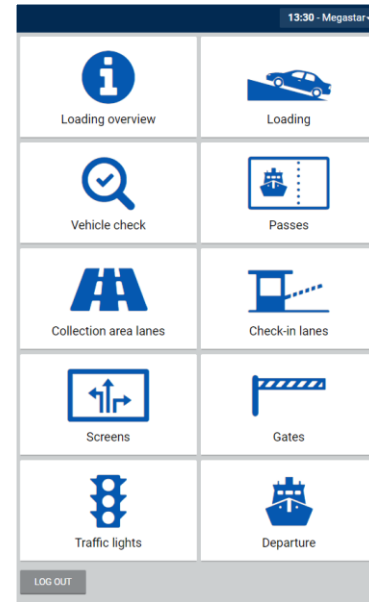

- Ticket and/or booking check
- Count passengers with speedgates and counting cameras
- Error handling through employee app
- Passenger guidance in terminal
- Passenger announcements and messages on screens

-
- Same speedgates can handle multiple operators' passengers
 - Multi-tier gate possibilities to better control passenger movement to correct operator and/or departure.

2. Smart Port at Port of Tallinn: Applications

Collection area lanes					13:30 - Megastar
NR	CLASSES	GATE	FULL C.	STATUS	
1	EL, WAITING, CVAN_EL, LRY_EL	5	ON	OPEN	MODIFY
2	CA, CAD	5	ON	OPEN	MODIFY
3	VE	5	ON	OPEN	MODIFY
4	MCCYK	5	OFF	OPEN	MODIFY
5	LTR3	5	ON	CLOSED	MODIFY
6	LTR1	5	OFF	OPEN	MODIFY
7	LTR2	5	ON	OPEN	MODIFY
8	BUSS1	5	ON	OPEN	MODIFY
9	CA	5	ON	OPEN	MODIFY
CANCEL					APPLY CHANGES

2 13:30 - Megastar				
ROUTED HERE (1)	IN CI AREA (1)	PASSED	Type here to filter...	ADD
9972MEG	1	T3	MODIFY	
4315MEG	1	T3	MODIFY	
2722MEG	1	T3	MODIFY	
2569MEG	1	T3	MODIFY	

Software applications for port and operator staff make the system easy to use

App for staff

- Loading, vehicle check, lane allocation changes, etc.
- Central control of gates, traffic lights, information displays, etc.

Check-in interface for ferry operators

- Vehicle information from pre-gate scanning
- Bookings' check

Admin console

- Reporting, schedules, configuration

+90% of employees happy with the ease & use of system (POT)

Partners

Smart Port system was developed and implemented with our innovation and digitalization partner **Nortal** (incl. system design, algorithms, integrations, user interfaces, reporting etc.)

Nortal is still involved to develop the system further.

Hansab is acting as a hardware partner.

An architectural rendering of a modern port development at dusk. A large, illuminated, sail-shaped structure stands prominently on the left. A long, curved promenade with trees and walkways extends from the base of the structure towards the water. In the background, a large cruise ship is docked at a pier. The entire scene is overlaid with a semi-transparent blue filter.

PORT OF  TALLINN

Innovation roadmap

4. Our vision for Smart ports

Seamless customer experience
where all unnecessary actions
have been removed

Data captured at every touch point
to **optimize and improve** through
predictive analytics

Sustainability and safety
reinforced through
smart technologies.

Smart Port roadmap ideas

Thank You!
