 **ENERGY SUPPLY**

 **CHARGING HARDWARE**

 **CHARGE POINT & ENERGY MANAGEMENT SYSTEMS**

 **ENERGY STORAGE & POWER SUPPLY SYSTEMS**

 **SOLUTION DESIGN & ENGINEERING**

 **SUPPORT & MAINTENANCE SERVICES**

 **SHORE POWER SYSTEMS & VESSEL CHARGING INFRASTRUCTURE**

Our turnkey solutions

Lower Total Cost of Ownership and higher value through efficiency and customised solutions that embed charging into your operations

Contargo: combination of energy storage, charging infrastructure, Cranes with energy management and solar integration

24

Trimodal terminals
(barge, rail, truck)

14

Terminals for
33 e-truck

77

250 kW DC
charge points

28

Cranes

3

Photovoltaic
systems

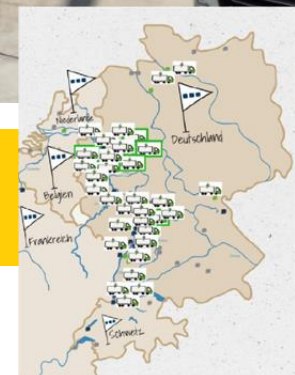

2592

kWh battery
storage

Contargo builds up the biggest private charging network for trucks in Germany with SBRS

Advanced operations management through intelligent infrastructure control

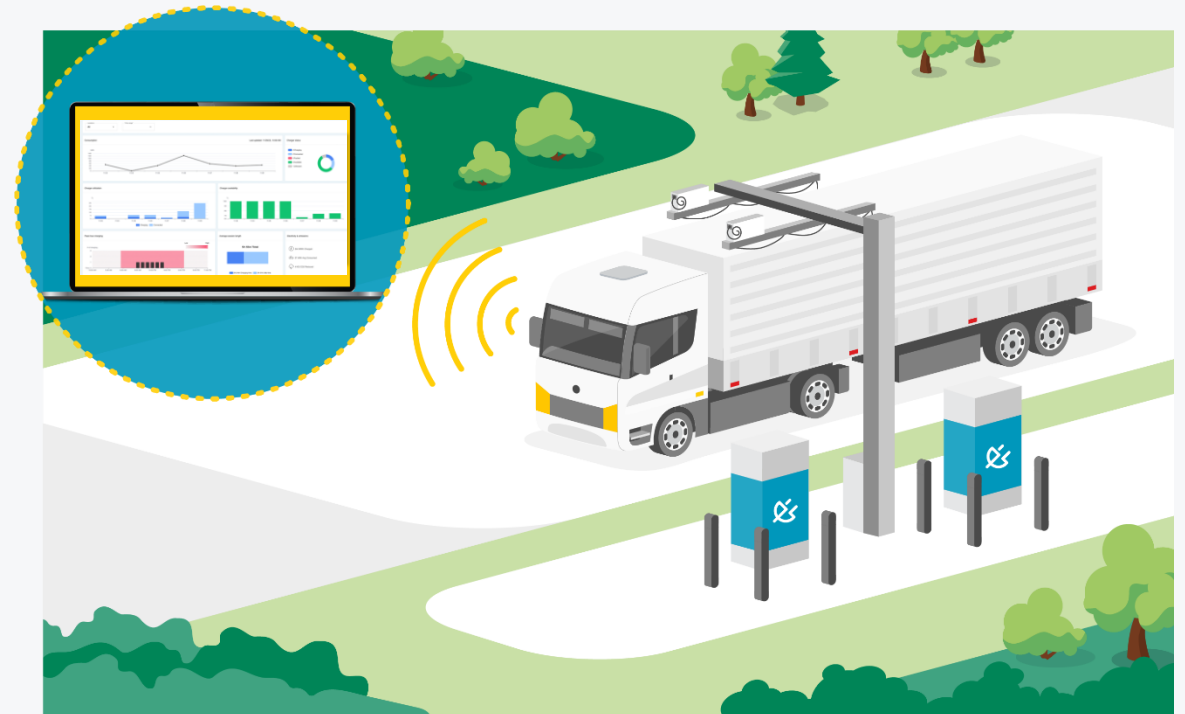

- Static load management
- Dynamic load management
- Scheduled Charging
- Save up to 30% on energy costs with energy supply and optimisation with day-ahead tariff*
- Grid code compliant charging

Solution design in line with your operational requirements and electrical site topology

Interested in learning more in a **fully integrated Energy Management System**, please contact us

Software tailored to each operator's need and designed for seamless integration

*Energy savings are estimated using the Gridcog web-based tool for energy optimisation
